Subject index

achievement goals, motivation, physical education, 281
achievement motivation, cluster analysis, friendship, peer acceptance, 1315
adolescents, Greece, perceived ability, task orientation, 367
aM3, cytokines, inflammation, Inmunoferon, exercise, sport therapy, 565
aMPK, carbohydrate, glycogen, genes, fat, MAPK, mTOR, protein, 709
anaerobic capacity, critical power, 1213
angiogenesis, b-FGF, a-FGF, exercise, cardiac muscle, 849
anthropometry, skinfolds distribution, athletes, elite, homogeneous, 69
anxiety, balance, gymnastics, heart rate, retrospective assessment, catastrophe theory, 157
arousal, disassociation, individual differences, liveliness, sensitivity, synchronization, 187
artificial fatigue, resultant joint moment, motion-dependent interaction, 951
assistant referees, energy expenditure, fatigue, fitness, mental performance, 795
athletes, demographics, endurance, environment, Kenya, 415
athletics, take-off angle, long jump, sports biomechanics, 889
attention, navigation, orienteering, 1103
augmented feedback, gymnastics, pommel horse, training, 149

basement membrane, collagen IV, exercise, metalloproteinase, 843
basketball, dynamics, free throw, release conditions, 1303
bicycle suspension, cycling, biodynamics, mountain bikes, sports engineering, 125
biomechanical analysis, kinematics, kinetics, 51
biomechanics, joint contributions, racquet speed, skin motion, tennis serve, 31
biomechanics, rowing, elite, face, power, 479
body composition, underwater weighing, lung volume, open-circuit approach, 825
body image, disordered eating, female athlete triad, amenorrhoea, 979
bootstrap method, inaccuracy, instability, training loads, swimming, 509
branched-chain amino acids, carbohydrate, dopamine, neurotransmission, serotonin, tyrosine, 773
burnout, depression, construct validity, 209

c-reactive protein, cytokines, exercise, immune system, inflammation, interferon-γ, 911
caffeine, high-fat meal, effort perception, incremental and endurance performance, trained individuals, 875
caffeine, sprint cycling, performance, SRM cranks, 1165
children, fitness, variation, shuttle run, 1025
coach development, decision making, coaching process, 549
coaching behaviour, soccer, youth, 355
cohesion, collective efficacy, individual performance, professional, basketball, 59
coping experiment, approach–avoidance coping, control process model, goal attainment expectancies, 299
coping, parental support, junior swimmers, 253
cortisol, exercise, interleukin-6, sex differences, 855
cortisol, testosterone, perceived recovery-stress state, preparatory period, rowers, 1075
cycling, competition, elite, retrospective analysis, prospective analysis, 1149

decision making, technical skill, fatigue, arousal, water polo, 807
dehydration, urinary measures, taekwon-do athletes, 869
delayed-onset muscle soreness, electrical stimulation, inflammation, pain, exercise, 941
deliberate practice, deliberate experience, non-linear development, transfer, ethnography, expertise, 309
direction change, speed, anticipation, acceleration, 919
downhill, mountain biking, power output, 863

eEG, observation, functional equivalence, shooting, 605
electromyography, motor control, cadence, co-activation, cycling, 115
elite athletes, children in sport, city size, relative age, athlete development, 1065
endurance exercise, bronchial nitric oxide, single exercise, chronic exercise, 1157
energy expenditure, EPOC, physical activity, resting metabolic rate, 1247
ergogenic aids, caffeine, endurance performance, field setting, 433
ethanol, intoxication, exercise, sport, soccer, 741
exercise, lymphocytes, neutrophils, cytokines, antioxidants, carbohydrate, 763

expert performance, far aiming, timing, visual control, 933
expertise, map, navigation, skill acquisition, 77
explicit, implicit, knowledge, golf putting, motor learning, 89

fat-free mass, indirect calorimetry, differences between the sexes, relative intensity, 1281
female athletes, young athletes, energy intakes, 783
football, sports ratings, 495

glycogen, refuelling, low energy availability, female athlete triad, 675
golf putting, methodology, sweet spot, direction deviation, distance deviation, 143
golf, putting, impact sound, perception, 443
growth, maturation, athletes, parents, football, 1039
gymnastics performance, multigroup structural equation models, reciprocal effects model, physical self-concept, 101

head anthropometry, differences between the sexes, Bland-Altman plots, 589
helmet ventilation, bicycle, comfort, heat exchange, 999
home advantage, soccer, territoriality, 231
hot environment, pre-cooling, thermoregulation, water ingestion, 3

illegal actions, International Cricket Council, upper-limb model, Vicon, 1127
imagery ability, measurement tool, motivational functions, 961
imagery use, injured athletes, qualitative analysis, 261
isometric contraction, fatigue, electromyography, coactivation, prepubescent, gender, 817

lean body mass, power output, Olympics, World championships, gender equity, athletics, swimming, 1329
load carriage, performance indicators, military fitness tests, mental toughness, Bruce protocol, field study, 597
log-linear modelling, body mass, reciprocal testing, velocities, 423
low-dose exercise, fitness training, autonomic cardiac control, heart rate variability, ageing, 1137

magnetic resonance imaging, anatomical muscle cross-sectional area, arm, children, 543
match-play activity pattern, substrate utilization, muscle metabolites, fatigue, recovery after matches, training intensity, 665
maturation, youth sports, peak height velocity, growth rate, 221
mental imagery, stretching, physiological imagery, biological imagery, movement imagery, imagery vividness, 197
metabolism, carbohydrate, glycogen, fat, protein, hydration, 723
metatarsophalangeal, foot, sprinting, performance, kinematics, elite, 175
moral identity, goal orientations, prosocial and antisocial functioning, 455
morality, prosocial behaviour, football, motivational climate, achievement goals, 575
motivational regulations, stages of change, exercise relapse, barriers self-efficacy, physical self-worth, social physique anxiety, 393
mountain biking, power, cadence, heart rate, 1047
muscle mechanics, sprint technique, force production, velocity, 165

near infrared spectroscopy, electromyography, isometric contraction, children, 1195
non-verbal communication, interpersonal perception, body language, 1265

offside, decision-making skills, assistant referees, 521
overarm throwing, skill, arm kinematics, unskilled arms, interaction torques, 1183

penalty kick, anticipation, action, perception, decision making, 467
pennation, biomechanics, vastus lateralis, fascicle length, resistance training, isometric strength, 501
peritoneal exudates, reactive oxygen species, lymphocyte proliferation, splenocytes, 973
physiology, activity patterns, water polo, game duration, playing position, 1173
plyometrics, dynamic constant external resistance, anaerobic performance, tests of athletic performance, 987
primary time constant, endurance, oxygen deficit, runners, 5 km, 1013
processing efficiency, anxiety, visual search, driving, 1223
psychological performance crisis, soccer, players' dismissal, group, 1083

questionnaire development, rhythm, validity, 899

reaction time distributions, time on task, information processing, sub-maximal exercise, energetic factor, facilitating effect, 323
recovery, eccentric contraction, muscle soreness, muscle stiffness, delayed-onset muscle soreness, 835
relative age effect, association football, soccer, talent identification and development, 405
rock climbing, electromyography, finger flexor muscles, fatigue, 181

sampling rate, heart rate, system identification, frequency response, 1115
self-handicapping hypothesis, causal explanations, perceived ability, 273

self-perception, endurance, training, rHuEPO injection, 383
semi-professional, collision sport, performance, training, football, 1273
shank and foot kinematics, time frequency filtering, soccer kick, ball impact, 11
skiing, fluid balance, ad libitum fluid ingestion, 137
soccer, exercise, muscle, nutrition, 749
soccer, football, carbohydrates, glycaemic index, fatigue, exercise capacity, 687
speed endurance, rhythm, pacing, tempo, 1095
speed skating, short track, starting position, finishing position, association, influence, 1239
stature, adiposity, multi-level model, activity recommendations, 241
swing-weight, tennis, baseball, golf, racket, power, 23

team identification, uncertainty, structure, 1203
training, cortisol, dehydroepiandrosterone sulphate, mood state, female, 1297

validity, racket sport, physiological responses, intermittent activity, 1291
video modelling, pommel horse, gymnastics, performance, 1055

water balance, electrolyte balance, sweating, hydration, sodium, 699
